

OBJECTIVES

At this time I am only considering any part time opportunities. I am also available to help with code reviews, design and architecture, Fusebox, Mach-II, Model-Glue, Reactor or any other software development related activity

SUMMARY OF QUALIFICATIONS

An innovative and energetic **project manager** with more than 7 years of in-depth experience in latest Web-based, desktop and enterprise software applications, software integration, GUI, databases, infrastructure, middleware, components and web services.

- Possess experience in full lifecycle development of commercial application software
 - Expert in figuring out/understanding needs, focusing on the important/real issues, translating them into technical actions and implementing code.
 - Successfully worked with and managed teams for enterprise level projects.
 - Expert coder with proven track record of success in creating new software, migrating & evolving existing software.
 - Constantly keep up with latest technology and development methodologies.
-

TECHNICAL SKILLS

Software: Eclipse , Microsoft Visual Studio, Dreamweaver MX, TOAD, SQL Server Enterprise Manager, Flex Builder.

Programming Languages/Frameworks: ColdFusion, Java, JSP/Servlets, JDBC, Visual Basic, VBA, Fusebox, Mach-II, Model-Glue, Reactor, ColdSpring, JavaScript, DHTML, CSS, SQL, PL/SQL, T-SQL, XML, and XSLT.

Databases: Oracle, SQL Server, Access, MySQL.

EXPERIENCE

INDUS Corporation (NIEHS)

3/06-present

Project Manager/Technical Lead/Site Manager - NTP Information Support Systems

- Serve as a technical lead on a project to migrate VAX based legacy systems to web based ColdFusion & Oracle applications while maintaining the existing systems.
- Implemented CMM level II on the project. Serve as the Configuration Manager, Requirements Manager, and Project Manager for CMM.
- Trained and mentored other team members with various technology issues.
- Implemented few established and proven management practices e.g. One-on-One meeting with direct reports, daily 10 min standup meeting with all staff and primary client, project tracking and oversight.
- Serve as Site Manager for two contracts with 6 employees. Perform all duties related to personnel management.
- Developed and documented a baseline release process using ANT according to CMM specifications.

INDUS Corporation (NIEHS)

8/2003-3/2006

Project Manager – NTP Database Search Application

- Promoted from Programmer Analyst position in September 2004..
- Detail data gathering and analysis regarding what the software is expected to do in the users' business or activity.
- Developing appropriate algorithms (problem solving methods) using knowledge of computer systems, software/ hardware architecture, the tools and platforms used in the development and the various development methodologies.
- Use ColdFusion's Fusebox and FLiP methodology to prototype, design, code, test and implement ColdFusion solutions.
- Responsible for seeing every project step-by-step through the software development life cycle (SDLC) and acted as Software Configuration Manager for CMM level 2.

Terra Dotta

02/2003 – 08/2003

System Analyst / Web Developer

- Worked on the company's flagship product "Edufolio" (e-Learning Software) and completed various modules in record time which includes but not limited to quizzes, surveys, grading module for teachers, parent's access to system.
- Solely architected and developed the version 1.0 of "StudioAbroad", which is another profitable product for the company.
- StudioAbroad was developed in ColdFusionMX, Fusebox 3 and was flexible enough to accommodate major databases (Oracle, SQL Server).
- Created Flash Communication Server components so that video/audio can be streamed and/or recorded within Edufolio.

Alpha-Gamma Technologies

07/2001 – 08/2003

Software Engineer

- Worked for the development of company's Web360 which is a complete solution for Professional Services Automation. Initially only Timesheet and Project Management Module were developed. Project Accounting, HR and integration with other systems like QuickBooks etc was incorporated later. Technologies used for development were J2EE, JSP, Java Servlets, EJB, Struts, and Oracle/SQL Server as backend databases.
- Designed and implemented an extensive Oracle 8i Web-based System used to collect and store pollutant information from various industries throughout the United States on daily basis. System had numerous stored procedures to optimize the database for achieving efficient internet response time. The web application was developed using Cold Fusion 5.0.
- Developed a web-based virtual marketplace that include development of an online catalog and store for a multinational vendor. This site involves MS SQL Server, MS Commerce Server, XML, COM, and ASP.
- Author required documentation for requirements, design, and testing purposes.

Crescent Textile Mills (Pvt) Limited, Pakistan

08/1999 – 03/2001

Quality Control Manager

- Implemented ISO 9000 based QC procedures for Quality Control Department.
- Developed a computer based quality control data storage and retrieval system.
- Design web-based reporting system in Cold Fusion and Oracle system.

Al-Abid Silk Mills Limited

09/1998 – 08/1999

Quality Control Inspector

- Managed quality control system on shift basis.
- Designed computer based QC management software system.

EDUCATION**MS Computer Science***North Carolina State University 2004 - GPA 3.93/4.0***B.E Textile Engineering***University of Engineering and Technology, Lahore, Pakistan - GPA 4.0/4.0*

PROFESSIONAL CERTIFICATION

- Macromedia Certified Advance ColdFusion MX Developer.
- Oracle Certified Professional (Oracle Certified Internet Database Operator).
